

# Make Homework Work

## Takeaways

1. Your role is to guide and encourage
2. Your child's role is to learn, not to perform!
3. Assessment is a form of communication and helps your child and their teacher adjust instruction.
4. We can learn from experience and challenges - the learning is in the struggle so encourage your child to wrestle with ideas before asking for help.
5. No single assignment defines your child as a learner. Think of homework as a building block.
6. Focus on engagement and understanding and not on grades and performance.
7. Along with your child communicate with teacher(s) and other school staff
